

## SMARTBoard Tips & Tricks

Use your SMARTBoard to send your students on a trip around the world... and beyond!

Step 1: Take a picture of your student and upload it to your computer.

Step 2: Use the Screen Capture Toolbar "Freehand Capture" to "cut" around and capture the student. This will send a capture of only the student into Notebook software, turning this capture into an image of the student.

Step 3: From the Gallery or a public domain picture site, bring an image of your travel destination into Notebook software.

## Tools for Learning Spotlight...

### SMART Response LE

Gain accurate and immediate insight into student understanding for learners in early education or those with special needs. SMART Response LE is a simply-designed and colorful interactive response system that integrates with SMART Notebook software.

With a range of easy-to-understand symbols on their handheld remotes, students of all levels of reading ability can use the big buttons to answer questions, receive instant feedback and stay engaged in lessons. And teachers can gauge student understanding on the spot so that they can adjust their teaching and be assured that every student in the classroom is up to speed.

See how SMART Response LE can help students express themselves.

 San Jose (408) 545-0555  
 Orange County (714) 966-1766  
 San Diego (858) 565-6323

Tips & Tricks Continued:

Step 4: Using the Object Drop-Down menu, Order the image of your student to Bring to Front.

Step 5: Drag the image of your student over the image of your location. You can Lock the picture to easily move images of students over the location, or group them together to create one object.

Your student is now being seen in the destination of your choice! Take them on a field trip to the Eiffel Tower, Mount Rushmore, the Moon, or even back to a time long ago! This SMART Board Trick is a good way to make your students feel like part of the larger world around them, and is a great way to grab attention and focus!
